

Press Release

For Immediate Release – November 24, 2009

Belden Presents its Industrial Connecting Solutions in a New Overall Product Catalog

Belden has issued a new overall Industrial Connecting Solutions catalog comprising extensive information on the combined portfolio of its Lumberg Automation™ and Hirschmann™ brand connectors and system components.

The product offering provides innovative wiring solutions for virtually any segment in the automation market. Key application areas are mechanical engineering, B&C installation and traffic engineering. The product program spans from sensor and actuator connectors to single-side or end-to-end pre-assembled connection leads, from I/O modules to complete I/O distribution systems for use in Fieldbus or Ethernet networks. A comprehensive range of accessories complements the portfolio.

All connectivity products are characterized by high resistance to mechanical and electrical loads. They are capable of withstanding a wide range of chemicals and can be handled with ease. On page 125 of the new Industrial Connecting Solutions catalog, users will find convenient product information, including order designations and order numbers. In addition to printed copies, the catalog is also available in electronic form. A PDF version (3.5 MB) can be downloaded from www.beldensolutions.com on the internet.

About Belden

Belden designs, manufactures and markets signal transmission solutions, including cables, connectors and I/O modules as well as network devices and control, load sensing and load moment limitation systems designed for safety-critical applications ranging from industrial automation to data centers, broadcast studios and the aviation and aerospace industry. The company focuses on segments of the worldwide cable and automation markets that require both highly specialized and readily available products. With manufacturing facilities in North America, Europe and Asia, Belden has recorded a total revenue of USD 2 billion for the fiscal year 2008.

Together with its brands Hirschmann™ and Lumberg Automation™, Belden offers an extensive and highly specialized product portfolio covering the full range of data communications – from the information and control levels down to the field level. The company has more than 15 offices throughout Europe, the Middle East and Africa, with manufacturing facilities in Czech Republic, Germany, the Netherlands, UK, Denmark, Italy and Hungary.
