NEW CATALOG FROM BELDEN: *Signal Transmission Solutions and Products*

Belden's new Signal Transmission Solutions and Products catalog illustrates the company's competence in the field of data transmission for various different application areas.

Amongst others, these include photo-voltaic plants, wind farms, refineries, pipelines, rolling stock, traffic control systems, mechanical engineering, data centers and broadcasting studios.

On 94 pages, the catalog presents complete solutions as well as individual Belden, Hirschmann™ and Lumberg Automation™ brand products facilitating fast and safe network connections. These products have been developed particularly for extreme application requirements and feature e.g. a wider operating temperature range, high resistance to jarring as well as enhanced insusceptibility to electrostatic discharge and magnetic fields. The product range spans from twisted-pair and fiber-optical cables, distributed I/O systems and fiber interfaces for various fieldbus types to Industrial Ethernet switches and Wireless LAN systems. The offering is complemented by a wide range of services, including network planning, installation and maintenance as well as project management and training.

The new catalog is available free of charge at www.beldensolutions.com. Copies in PDF format can be downloaded from www.beldensolutions.com/downloadcenter.

About Belden

Belden designs, manufactures and markets signal transmission solutions, including cables, connectors and I/O modules as well as network devices and control, load sensing and load moment limitation systems designed for safety-critical applications ranging from industrial automation to data centers, broadcast studios and the aviation and aerospace industry. The company focuses on segments of the worldwide cable and automation markets that require both highly specialized and readily available products. With manufacturing facilities in North America, Europe and Asia, Belden has recorded a total revenue of USD 2 billion for the fiscal year 2008.

Together with its brands Hirschmann™ and Lumberg Automation™, Belden offers an extensive and highly specialized product portfolio covering the full range of data communications – from the information and control levels down to the field level. The company has more than 15 offices throughout Europe, the Middle East and Africa, with manufacturing facilities in Czech Republic, Germany, the Netherlands, UK, Denmark, Italy and Hungary.
